

# AV for book binding

## Product Overview

### General Properties

AV is ideally suited for the book-binding and shoe industries having been designed for excellent performance on specialist PVC, coated substrates, real and imitation leathers.

### Main Applications

- Flexible, plastic substrates such as PVC, Pyroxylin, Vinyl and imitation leather
- PVC-coated papers including Balacron, Discotex, Wintrol and some other plastic-coated papers
- Real and imitation leathers
- Many conventionally coated papers

### Key Features

AV's easy release system and heavy adhesive coat makes it ideal for:

- large area printing (as well as some detail work)
- coarse, grained and woven surfaces being completely resistant to plasticiser migration

AV has been developed specifically to work in conjunction with the platen action typical in the bookbinding industries.
