

# KC for acetate laminates

## Product Overview

### General Properties

KC's heat resistance and low temperature application make it ideal for foiling on to acetate laminates

### Main Applications

- Acetate laminates
- Coated and printed substrates
- Varnished papers and boards
- Coated bookbinding materials
- Self adhesive labels

### Key Features

KC product has excellent embossing characteristics making it suitable for foil designs incorporating embossing on acetate laminates and a variety of other substrates.

Good heat resistance means KC can be used on most types of foiling equipment including platen, cylinder and rotary presses.

The low temperature activation of the C adhesive provides KC with a wide operating window and excellent versatility.
