

LS for water based coatings

Product Overview

General Properties

LS sets the standard for excellent fine detail and the ability to print on to a range of substrates. With a particular strength over water based coatings, where blistering problems are prominent with many other foils, LS will do the job where others fail.

Main Applications

- Suitable for most types of inks, varnishes and coatings, typically UV, conventional and water-based.
- Coated and uncoated paper and board.

Key Features

LS foil has mid-range release characteristics with good rub resistance in graphic applications.

The S Adhesive is an excellent general purpose adhesive for cartons and greetings cards
