

# MC for rotary labels

## Product Overview

### General Properties

MC is primarily targeted at the market for labels and for use on rotary presses.

The high volumes required in many label applications require high speed foiling solutions, and MC is ideally suited for these types of applications.

### Main Applications

MC is a high specification foil and able to work on a number of different applications. These include:

- UV cured inks and coatings
- Conventional ink printed paper and board
- Coated paper and board
- Acetate laminates
- Self adhesive papers

### Key Features

MC's excellent heat resistance means the foil can be used on most types of foiling equipment including platen, cylinder and rotary presses.

The low temperature activation provides this foil with a wide operating window and excellent versatility.
