

MH for large area coverage & embossing

Product Overview

General Properties

With its heavy coat weight of adhesive, low activation temperature and easy release MH is the first choice for large image areas on difficult uncoated substrates. The product is a fine choice for applications combining foiling with embossing and will work across most commonly used substrates.

Main Applications

- Suitable for most types of inks, varnishes and coatings, typically UV conventional and water-based.
- Coated and uncoated paper and board.
- Also suitable for some bookbinding and leather substrates.

Key Features

The M Release/lacquer has easy release characteristics with good rub and abrasion resistance in graphics applications.

The H adhesive has a heavy adhesive coating making MH an excellent foil for large image areas. Foiling characteristics range from medium detail to large area coverage.
