

SP for OPP laminates

Product Overview

General Properties

SP's release / lacquer and its aggressive adhesive make it a versatile foil which is particularly suitable for foiling onto OPP laminate.

Main Applications

- Laminates including OPP
- Conventional ink printed substrates
- Conventional and emulsion coatings
- Dry and uncoated papers and boards

Key Features

The SP product is versatile, therefore suitable for fine detail to large area coverage, has a receptive surface meaning it can be overprinted and is heat resistant providing a versatility of use on platen, cylinder and rotary presses.

The P adhesive is aggressive and is ideal for foiling on to OPP laminate and, in conjunction with the S release/lacquer, enables it to be used in applications which demand very high resistance properties (such as water, wines and spirits, cosmetics and toiletries).
